

2020 - 2030
LONG TERM
FINANCIAL PLAN

This Long Term Financial Plan 2020-2030 was adopted by Council at its Ordinary Meeting held Thursday 16 July 2020, following consideration of any comments or submissions received from public exhibition and consultation with the community.

Introduction

The Long-Term Financial Plan (LTFP) is a planning and decision-making tool that shows the long-term financial impacts of Council's decisions based on a set of assumptions. It is a requirement under the Integrated Planning and Reporting framework for NSW Local Government. Snowy Valleys Council's LTFP is an important and central part of Council's strategic planning process that spans a rolling 10-year period and is a document that is intended to remain flexible. The LTFP is reviewed and updated at least annually. However, in the current uncertain economic environment, Council will review the LTFP as necessary.

The three key elements of the LTFP correspond to Council's primary financial reporting documents, namely the income statement, the statement of financial position and the statement of cash flows. The income statement (or profit and loss statement) details Council's operating revenue and expenditure associated with ongoing activities with a focus on the operating result which shows whether Council is spending more or less than it earns. The statement of financial position (or balance sheet) details changes in Council's assets and liabilities. The statement of cash flows details where Council plans to generate and spend its cash in operating (ongoing) activities and capital programs (renewals, upgrades and new assets).

The key focus of this updated LTFP is Council's General Fund which includes all activities except for water supply and waste water businesses, which are accounted for separately under National Competition Policy requirements. Two scenarios are considered:

- a planned scenario; and
- an unsustainable scenario.

Financial modelling has also been completed for Council's Water Supply and Waste Water Funds. Only one scenario each for the Water Supply and Waste Water Funds is included in this updated LTFP at this stage. Further modelling work will be undertaken in the near future as noted in Council's Road to Sustainability Plan February 2020.

1. Key Financial Sustainability Objectives

Council recognises that the principles of sound financial management in the NSW Local Government Act (section 8B) emphasise two key elements:

- Responsible and sustainable spending (aligning general revenue and expenses and achieving a small operating surplus); and
- Responsible and sustainable infrastructure investment (adequate provision in maintenance and renewal).

Assumptions informing the planned scenario for the General Fund have been developed with the primary aim of achieving an operating surplus over the 10-year period.

Council also ensures it provides sufficient funding for renewal of existing assets based on an analysis of actual renewal requirements as set out in its Service Management Plans. Because its assets are in good condition, Council proposes to keep its renewal program stable, but may revise this forecast following a needs analysis in consultation with users.

In addition to the above, Council aims to maintain sufficient cash, manage its debtors, to maintain its debt within acceptable limits and to keep the typical residential bill for water and waste water services as low as possible and stable over the long term. Initial modelling has been undertaken to assess the need for changes. It is expected that further revisions will be necessary following further analysis.

2. Key Items of Operating Revenue and Expenditure

The following charts summarise the key areas of revenue and expenditure associated with operational programs in Council's 2020/21 budget for the General Fund:

Council receives 50% of its revenue from rates, levies, annual charges and user charges and fees. The expiry of the special rate variation in the former Tumut Shire area resulted in reduced rates revenue of approximately \$637K. 47% of revenue results from operational and capital grants, which for 2020/21 include a \$5M grant from Softwoods funding. The remaining 3% of revenue are from investment returns and other income streams.

Council expenditure on employee benefits comprises 42% of total expenditure. Materials, contracts and other expenses that are used in direct inputs to operations make up 33% and depreciation 25%. Interest payments on outstanding loans are below 1% of total expenditure.

3. Special Rate Variation and Rates Harmonisation

A Special Rate Variation (SRV) applied to residential and business land in the former Tumut Shire and expired at 30 June 2020. The NSW Office of Local Government instructed Council to remove the SRV regardless of the postponement of the rates harmonisation and consequent extension of the rates freeze. The resulting reduction in rates revenue is approximately \$637K for the 2020/21 financial year, resulting in Council having to fund some of its capital works program from the general fund. Council intends to bridge the operational

funding gap via the actions in Council's Road to Sustainability Plan as well as the pursuit of alternative revenue streams and a review of service levels.

In February 2020 Council endorsed the Snowy Valleys Council Rates Options Study containing various options for rates harmonisation for the purpose of seeking community feedback. Community consultation will inform Council's decision-making for harmonising its rates beginning 1 July 2021.

4. Planned Scenario

The assumptions that inform the Planned Scenario are detailed below. The primary financial reports for the scenario follow the discussion of assumptions. It is noted that the assumptions relate to Council's General Fund only, and separate modelling for the Water Supply and Waste Water Funds will be undertaken in the near future. It is also important to remember that the LTFP is subject to uncertainties and change including changes due to uncontrollable events such as legislative changes, natural disasters and economic shocks.

Rates and User Fees & Charges

Rates, Fees and Charges are assumed to increase in line with CPI. Council harmonised its utilities charges prior to July 2019 and with the exception of CPI no further changes to these have been assumed.

Employee Costs and Organisational Structure

Council's current organisational structure budget reflects all current positions. It is based on the re-structured administration that was put in place in November 2019. Further organisational structure reviews are expected and will have an impact on future planning.

Employee costs make up 39% of consolidated Council ongoing expenses (General Fund 42%, Water Supply Fund 23%, Waste Water Fund 28%). The overall salaries and wages budget is \$16.5M for the financial year 2020/21. Cost decreases result from the recent restructure and from a shift in accounting for some employees (primarily those working in the Infrastructure Works division) from operational activities to capital activities, particularly grant-funded construction projects. Cost increases result from mandated wage increases under the Local Government Award and staff moving through the Award structure. Historically Award increases have been higher than CPI and the allowable increase in rates revenue under the rating peg. Further wage increases are required resulting from the statutory increase in superannuation contributions from 9.5% to 12% by 2025/26.

The Planned Scenario also provides for an efficiency component whereby all positions will be subject to review upon vacancy and a consistent vacancy rate is assumed. The planned scenario assumes that these shifts can be sustained in the long-term.

Materials & Contracts and Other Inputs

Materials and contracts make up 22% and other operational inputs 13% of Council ongoing expenses. These costs are assumed to increase in line with CPI, however, some items may have movements outside CPI. Council's Road to Sustainability Plan outlines the need for a review of Council's procurement processes to identify opportunities to generate savings. This has been incorporated into the LTFP as ongoing savings from day-to-day operations.

Population Growth Projections

Population growth is forecast to be less than 1%. Due to the minor forecast, the LTFP has been prepared based on a no-net population change basis.

Indexation

Base indexation of assumed CPI of 2.5% has been used in the determination of future years with a reduced figure of 2.2% for materials & contracts and 2% for other expenditure.

Asset Ownership & Management

Council is seeking to maximise the useful life of all assets and will achieve this by adequately funding maintenance and renewals. Council continues to manage assets in accordance with its adopted Asset Management Plans. Council owned/controlled assets will receive priority spending and Council will continue to review circumstances that have an impact on strategy, including condition assessment protocols, determining remaining asset lives and service levels.

Asset Renewal

The forecast expenditure is sufficient to meet the cost of predicted asset renewals. Decreasing expenditure in this area would risk declining levels of asset conditions, leading to more costly replacements and/or reductions in service levels. Council is fully utilising the revenue from Roads to Recovery and other State and Commonwealth grants to fund renewals and maintenance activities. A key assumption in the LTFP is that capital works are linked to external grant funding. Should the level of grant funding decrease in future years, Council may need to identify additional income sources and/or reduce the service levels provided.

Depreciation

Depreciation makes up 26% of consolidated Council operating expenses (General Fund 25%, Water Supply Fund 31%, Waste Water Fund 26%). The forecast assumes no significant valuation movements that would affect the current charges for depreciation and the method for applying useful lives. While there is potential to reduce depreciation by disposing of underutilised assets, such a move would need to be considered in consultation with users.

Council's transport network is being revalued in the financial year 2019/20. At this stage there is no indication whether this will result in a change to depreciation expenses.

Natural Disasters

The LTFP assumes that Natural Disaster impacts will be funded for public infrastructure from State / Commonwealth natural disaster arrangements. However, the recent bushfire crisis has shown that in the case of a major disaster, these funding arrangements are inadequate to cover all costs to Council. No allowance has been made for future disaster events. Funding is not received for Water and Waste Water Infrastructure, Public Open Space and Recreational Facilities, damage to which has to be funded from available reserves or is covered under insurance arrangements.

External Factors

In the past few years financial assistance grants have been partially prepaid. While this has a negative effect (reduction in income) on the operating budget of the following year, the fact that it has occurred on a regular basis has resulted in minimal impact against forecast income. The planned scenario is making the assumption that all grant funding will be received during the financial year it has been allocated.

Interest Rates

Due to the recent and ongoing economic uncertainty a conservative approach has been taken for 2020/21 for interest on investments. For the following years, a figure of 2.5% has been assumed.

External Borrowings

Council currently holds a number of external loans against water, waste water, caravan park and building assets, with no future loans forecast within the LTFP. Loans will be considered in future plans where required.

Planned Scenario – Primary Financial Reports

Following are the reports for Council's General Fund, Water Supply Fund and Waste Water Fund and a consolidated model incorporating all three.

General Fund Income Statement

Account Description	Planned Scenario

5. Unsustainable Scenario

The Unsustainable Scenario shows the implications of a 'do nothing' approach on Council's financial performance over the next 10 years.

Assumptions

The key assumptions contrasting to the planned scenario are:

- Revenue fees and charges – reduced private work income due to lack of available contracts and/or non-competitiveness
- Revenue other – Council is unable to source additional income
- Employee costs – reduced capitalisation opportunities due to staff being utilised in operations rather than capital works
- Materials and contracts – rise in costs due to reduced savings from day-to-day operations and rising inflation
- Other expenses – rising costs due to reduced savings from day-to-day operations and rising inflation

Implications

The Unsustainable Scenario shows an operating deficit after capital grants for all 10 years. The importance of the implications of an ongoing operating deficit forecast in this scenario cannot be overstated. Over 10 years the cumulative deficit reaches \$30M. This scenario fails to meet the key principle of financial sustainability to achieve a balanced result.

The Planned Scenario outlines that Council's sustainability cannot be maintained if grant funding reduces. Over the longer term, as assets which are currently in good condition deteriorate, Council will need to increase its investment in renewals and to do so it will need to draw on its operating income and its reserves unless additional grant funding can be sourced. The Unsustainable Scenario shows no room to achieve this.

Without taking measures to increase revenue and decrease expenditure, Council will not be able to afford the provision of the level of services and infrastructure it currently provides to the community. Such a course of action will also fail to meet the key principle of financial sustainability regarding intergenerational equity.

Based on feedback received from the community as part of the Service Level Review project, Council does not believe that the community will be willing to accept reduced service levels or declining infrastructure.

Unsustainable Scenario – Primary Financial Reports

Following are the reports for Council's General Fund and the consolidated model. Note that the Water Supply Fund and Waste Water Fund do not change under this scenario.

6. Sensitivity Analysis

Both the planned and unsustainable scenarios have been evaluated in relation to their sensitivity to changes in the assumptions.

Employee Costs

Council's ability to realise the savings proposed in relation to employee costs has a major impact on future performance. A key issue is the level of capitalisation (allocating employees to capital works programs rather than operational) and the level of resourcing required for civil contracting activities.

Future increases (indexation) of employee costs due to award increases and progression of staff through the salary system are critical components of the modelling. Employee costs increasing by an average of 3.5% rather than the assumed 2.5% results in an additional \$1.8M to employee costs by the end of the 10-year period.

Interest Rates

Council has very low levels of borrowings and the existing loans are at fixed rates with interest payments decreasing over time. However, the interest received on investments can have an impact on operating results. Further, utilising reserves for major capital investments decreases the available investment assets from which interest is received.

Capital Works Programs

A significant increase in Council's capital works programs over what is proposed in the updated LTFP will reduce its reserves. In particular, if Council embarked on adding new capital projects resulting in additional assets, not only would the reserves decrease, but operational costs would increase both for maintenance and depreciation.

Grant Programs

Council relies heavily on external funding for its operations and capital works renewal program. If such grants were reduced or discontinued, Council would have to generate considerably more revenues from other sources. It has been assumed that Government funding remains at current levels, however, should such funding decrease as a consequence of current economic stimulus spending, Council's operating result would significantly worsen.

Rates Income

Rates Income is restricted to rate pegging as set each financial year by the Independent Pricing & Regulatory Tribunal (IPART). If rate pegging was abolished, Council would have greater flexibility to achieve financial sustainability.

Cost Shifting

Over the years other levels of government have shifted costs associated, among other, with emergency services, weed management, food safety regulation, road safety programs and collection of fire and emergency services levy to local government without funding. It is likely that this trend will continue into the future and negatively affect Council's operating results.

Energy Costs

Increased energy costs are occurring with Council continually looking at ways to minimise future costs. Solar panels and geothermal heating/cooling for the Riverina Highlands building have resulted in savings with further projects being investigated.

Insurance and Workers Compensation

Forecasting insurance premiums is difficult. Premiums are influenced by a number of issues, including the occurrence of natural disasters, economic uncertainty and climate change. Workers compensation premiums can increase at any time following a rise in claims or with major open cases. Council's risk management committee is committed to reducing premiums and claims through increased risk mitigation, awareness and work place safety programs.

Superannuation

Council is responsible to fund investment shortfalls in the defined benefits member scheme until all staff in the scheme have retired. Given the current economic circumstances, it is likely that Council will be called upon to fund investment shortfalls in this scheme. However, no additional allowance has been made in the financial forecast at this stage.

7. Indicators

Council's key objectives include the achievement of an operating surplus over the planning cycle and adequate funding of asset renewals. This is achieved under the Planned Scenario. Other considerations include the achievement of industry benchmarks that Council has to report on as part of its annual report.

The following ratios are anticipated to occur under the Planned Scenario:

Operating Performance Ratio – Benchmark > 0%

This ratio measures financial sustainability and indicates Council's capacity to meet its ongoing expenditure by comparing revenues with operating expenses (excluding capital grants and contributions). In the planned scenario, Council does not reach the benchmark until 2029/30.

Own Source Revenue – Benchmark > 60%

This ratio indicates Council's ability to control its own operating performance and financial sustainability. It compares operating revenues gained from sources other than grants and contributions to its total operating revenues. Council meets this benchmark in 8 out of 10 years.

Unrestricted Current Ratio – Benchmark >1.5

This ratio indicates Council's ability to meet short term obligations as they fall due. Council meets this ratio throughout the period of the LTFP.

Debt Service Cover Ratio – Benchmark >2

This ratio indicates the proportion of operating revenues being utilised for interest and principal repayments on loans. Council is well within the benchmark over the entire period of the LTFP.

Rates and Annual Charges Outstanding – Benchmark <10%

This ratio assesses the impact of uncollected rates and charges on liquidity and the adequacy of recovery efforts. It is expected to be achieved over the entire period of the LTFP. However, the current economic situation may have an effect on rates and charges collection in the next one to two years.

Cash Expenses Cover Ratio – Benchmark >3 months

This ratio indicates Council's liquidity. It determines the number of months a Council can continue paying for its immediate expenses without additional cash flow. The ratio is expected to be achieved over the period of the LTFP.

8. Capital Works Program

The capital works program for 2020/21 is included in the operational budget paper. The chart below shows the planned capital expenditure over the next ten years.

Council's Strategic Asset Management Plan contains further information on Council's asset portfolio.
